How to Reinvest Your Company Stock Dividends

Any dividends you receive as a result of owning company stock are deposited into your Fidelity Account® as cash by default. You can change this option so that dividends are reinvested to purchase more shares of company stock.¹

To do this, simply follow these steps:

1. Go to Fidelity.com.
2. From the main menu, select Accounts & Trade, followed by Account Features, and log in.

This page is where you update the distribution method for any dividends and capital gains that may be paid out for your equity and mutual fund holdings.

Note: You will be given the opportunity to apply the update to all similar securities/positions in your account.

Click Update for the specific security you wish to change.
Choose either “Reinvest in Security” or “Deposit to Core Account” and decide whether you want the change to apply to all similar equity positions. You can also indicate whether you want the change to apply to future purchases, transfers, and deposits.

Click Update when you are done to complete the transaction.
